To Neal & team,

I have been using Steamatic now for 10 years. We have used Steamatic for two major problem areas in our business, one being the cleaning of the exhaust stacks in the Engine Plant & the other is the extraction system in our main canteen. In both cases we haven't had any blockages / fires etc in the exhaust stacks nor have we had any non-compliance issued to us from food safety. Neal & team are always available to assist us where they can & provide an outstanding service.

Regards,

Simon Connelly
